Fournitures Bluetek  
Provided by Bluetek

Embase (X 1)  
Polyester upstand (X 1)

Kit montage comprenant joint, vis de fixation et notice  
Assembly kit including joint, screws set, and instructions

Dormant (X 1)  
Frame (X 1)

Ouvrant (X 1)  
Opening frame (X 1)

Ensemble vérin comprenant vérin 220 V, support de vérin + fixation dormant, support de vérin + fixation ouvrant, axe et notice  
Jack set composed of electrical actuator 220 V, support + screw set for the frame, support + screw set for opening frame, axle and instructions

### Outillage à prévoir / Needed tools

Cutter  
Cutter

Mètre ruban  
Measuring tape

Visseuse + embout cruciforme  
Screw-gun + cross-head bit

Marteau  
Hammer

Crayon à papier  
Pencil

Douille de 8 mm  
8 mm diameter socket

### Montage / Assembling

**1** Retourner le dormant et poser le joint autocollant fourni dans le kit de montage sur les 4 côtés  
Turn the frame and fix the self-adhesive seal provided on each side.

**2** Poser et centrer le dormant sur l'embase (attention à la position des charnières qui doivent toujours être en haut de pente)

Place the frame on the upstand and centre it (Be careful: the hinges must always be at the top of the slope).

**3** Utiliser les vis 4,5 X 45 mm fournies pour fixer le dormant sur l'embase (utilisez les trous pré-perçés)

Fix the frame on the upstand with the provided 4,5x4,5mm screws. (Use the pre-drilled holes).

**4** Utiliser les vis 4,8 X 45 mm fournies pour positionner le vérin à l'intérieur de l'embase (à 10 mm du relevé d'eau), chaîne du vérin centrée sur l'embase

Place the actuator inside the upstand by using the provided 4,8x45mm screws (the jack must be placed at 10mm from the water rejection piece). The jack's chain must be centred on the upstand.

**5** Positionner les 1/2 charnières du cadre ouvrant dans les 1/2 charnières du cadre dormant (manipulez avec prudence car le remplissage est en verre)

Place the 1/2 hinges of the opening frame in the 1/2 hinges of the frame (handle the glass carefully).

**6** Frapper les axes de charnières prémontés pour fixer le cadre ouvrant

Hit the pre-mounted hinges pins to fix the opening frame.

**7** Utiliser les vis fournies pour fixer la console du vérin dans l'ouvrant

Fix the jack's console inside the opening frame with the provided screws.

**9** Retirer la goupille et l'axe du vérin. Fermer l'ouvrant et introduire l'axe. Verrouiller avec la goupille

Remove the pin and the jack's pin. Close the opening frame and insert the axle. Lock with the pin.
