

- Pressure-resistant, universal and multifunctional
- Outstanding insulating against thermal losses in winter and heat transmittance in the summer
- Possesses outstanding sound-insulation properties

Product description

PAVATHERM is a high-performance pressure-resistant, vapour-permeable, natural and ecological thermal insulation board based on wood fiber.

The board is universal and multifunctional suitable in the roof, the wall, the facade and the floor.

The high thermal performance and heat accumulating capacity together with the convenient size, makes the board the ideal solution.

To avoid thermal bridges, the board edges from 140 mm and up have a rebate finish.

Due to the porous structure, the board also has outstanding sound-insulation properties.

Always consult the local regulations and installation guidelines of the manufacturer.

Health, Environment and Safety

This product does not contain any substance which is likely to be detrimental to your health or to the environment and complies with generally admitted Health and Safety Requirements.

For more information, please refer to the relevant safety data sheet.

Storage

Store the insulation boards on a flat surface, keep dry and protected from sunlight.

Stack no more than 4 pallets on top of each other.
