

COLPHENE BSW H

COLPHENE BSW H is a high-performance waterproofing membrane composed of SBS modified elastomeric bitumen and a non-woven polyester reinforcement.

The topside is coated with specially engineered carbon dioxide crystals and the underside is covered by a thermofusible film.

Thanks to its special formulation and composition **COLPHENE BSW H** has excellent, continuous and homogenous bond to poured structural concrete to increase resistance to hydrostatic pressure with superior mechanical properties.

Its unique design, including the **DUO SELVEDGE** technology, allows welding of side laps using a torch or a hot-air welder.

User application

COLPHENE BSW H is a pre-applied membrane designed for horizontal blindside waterproofing applications (below grade and tanking works).

All the applications are described in **SOPREMA's** Technical Guidelines in force.

Composition

	COLPHENE BSW H
Reinforcement	Non-woven polyester
Binder	Elastomeric bitumen: blend of selected bitumen and SBS* thermoplastic polymers
Thickness (EN 1849-1)	3,5 mm (-5% ; +5%)
Weight (EN 1849-1)	4,3 kg/m ²
Topside	Specially engineered carbon dioxide crystals
Underside	Thermofusible film
Overlap (DUO technology)	100 mm covered with a release film (55 mm sticky bitumen + 45 mm thermofusible film)
*According to UEAtc directives concerning the normalization of waterproof elastomeric SBS bitumen coverings	

Packaging

	COLPHENE BSW H
Dimensions of the roll	10 m x 1 m
Weight of the roll	about 43 kg
Storage	Rolls must be stored upright, with the selvedge side on top. If the product is stored outdoors, cover them with an opaque protective cover after removal of the delivery packaging
Roll lengths are given with a tolerance of < 1 %. Width of roll is given with a tolerance of 1% (UEAtc). Rolls must be stored upright on flat ground. During storage, protect the rolls against moisture. In cold weather, we recommend that the rolls be kept at a minimum temperature of + 2°C (+ 36 °F) for at least 5 hours before installation.	

Characteristics (outside CE marking)

	Test method	COLPHENE BSW H
Tensile strength @peak load MD/CMD	ASTM D5147	≥ 17 / 11.5 kN/m
Elongation @break, MD/CMD	ASTM D5147	≥ 60 % / 65 %
Tear strength, MD/CMD	ASTM D5147	≥ 600 N / 400 N
Resistance to puncture, MD/CMD	ASTM E154	≥ 1210 N
Water vapour transmission	ASTM E96 method B	< 2.1 ng / (Pa·S·m ²)
Water absorption	ASTM D570	< 0.9 %
Peel strength Adhesion to poured structural concrete	ASTM D903	≥ 3400 N / m
Resistance to hydrostatic head	ASTM D5385	≥ 110 m (≥360 ft)
Lateral water migration	ASTM D5385 modified	≥ 110 m (≥360 ft)
Gas permeability, 10 ⁻⁶ m ³ /(m ² ·D)	ASTM D1434	< 60
Low temperature flexibility	ASTM D5147	Unaffected @ -18°C
Radon gas diffusion coefficient D on overlap	K124/02/95	6.6 (±0.3) x 10 ⁻¹² m ² /s 2.2 (±0.1) x 10 ⁻¹² m ² /s

Installation

COLPHENE BSW H is installed loose laid on the concrete slab or compacted soil.

To prevent overly thick membranes, stagger the end laps by a minimum of 300 mm.

Side lap joints must be a minimum of 100 mm and end lap joints must be a minimum of 150 mm.

Membranes overlaps are sealed, by heat-welding, with a gas torch or using an electric hot-air welder.

All angle changes (inside and outside corners) and others details must be reinforced by heat-welding an additional 300 mm piece of **COLPHENE BSW H** centered on the angle.

It is recommended to install **COLPHENE BSW PROTECT'R**, as a protection layer, over the **COLPHENE BSW H** prior to placement of the reinforcement steel bars and pouring of the concrete slab.

DUO SELVEDGE

Over the entire width of **DUO SELVEDGE**, 55 mm of the surface is covered with exposed sticky bitumen. The remaining surface of the selvedge 45 mm is covered by a thermofusible film to seal overlap by heat-welding with a gas torch or an electric hot-air welder.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.

Special indications

Hygiene, health and environment:

The product does not contain any substance likely to be detrimental to health or to environment and complies with generally admitted Health and Safety Requirements. For further information, please refer to relevant Safety Data Sheet.

Traceability:

Product traceability is ensured through a manufacturing code present on the packaging.

Quality control:

SOPREMA has always attached the highest importance to the quality of its products, to the respect of environment and people.

For this reason, we apply an integrated management of the Quality and Environment certified **ISO 9001** and **ISO 14001**.

CE marking

 1119
COLPHENE BSW H SOPREMA 14 rue de Saint-Nazaire – CS 60121 67025 STRASBOURG cedex 14 Construction Product Regulation (CPR) Declaration of Performance: DoP n° WPBEX250 Certificate of Factory Production Control: 1119-CPR-13136, 13137, 13138 (EN 13969)
EN 13969 Membrane composed of modified elastomeric bitumen and non-woven polyester reinforcement. Topside is coated with specially engineered carbon dioxide crystals and the underside is covered with a thermofusible film. Dimensions 10 m x 1 m x 3,5 mm. Must be loose laid. For below grade and tanking works.

Essential characteristics	Performances	Harmonised Technical Specification
Reaction to fire (EN 13501-1)	E	EN 13969:2004 + A1:2006
Root resistance (EN 13948)	NPD	
Peel resistance of joints (N / 50 mm) (EN 12316-1)	≥ 100	
Watertightness (EN 1928)	Conform	
Resistance to impact – Method A (mm) (EN 12691) Method A is on rigid substrate (aluminium)	≥ 1000	
Shear resistance of joints (N / 50 mm) (EN 12317-1)	≥ 700	
Flexibility at low temperature (EN 1109)	≤ -16°C	
Tensile properties: (EN 12311-1) Tensile strength L x T (N / 50 mm) Elongation L x T (%)	800 (±100) x 800 (±100) 40 (±10) x 40 (±10)	
Resistance to static loading (kg) Method B (EN 12730) Method B is on rigid substrate (concrete)	20 (±5)	
Resistance to tearing (nail shank) L x T (N) (EN 12310-1)	250 (±50) x 250 (±50)	
Durability (EN 1296 / EN 1928) Watertightness after ageing	Conform	
Dangerous substances (Notes 2 and 3)	Complies	

Note 2: This product does not contain asbestos or tar constituents.

Note 3: Since there is no European test method available, no performance declaration for leaching behavior can be made. It must be made according to national rules in force in the place of use.

Additional characteristic	COLPHENE BSW H
Durability (EN 1296 / EN 1110) Flow resistance at elevated temperature after ageing	≥ 90°C
