

# DISC for TUNNEL LINING (TPO)

## TPO ACCESSORIES FOR UNDERGROUND WORKS

### USE - APPLICATION

The DISC for TUNNEL LINING allow you to fix the geotextile to the vertical support of foundation or tunnelling. The discs are fixed with a special gun with an explosive charge.

Once the geotextile is fixed, the discs serve as anchor points for the welding of the waterproofing membrane to the vertical wall. The welding are made with hot air with manual welder.

These accessories are made with the same material that constitutes the waterproofing membranes FLAGON TPO.

The DISC for TUNNEL LINING are compatible with all the accessories and membrane in the FLAGON TPO range.

### DESCRIPTION

The DISC for TUNNEL LINING are in TPO and have a central cavity to take a washer for the fixing nail. On the lower face the disc is ribbed to improve the adhesion to the support.

Laying by installer approved by Civil Rock.

CIVILROCK attaches the highest importance to the quality of its products. This is why we operate a quality assurance system according to ISO 9001 BSI certified.

### MAIN ADVANTAGES

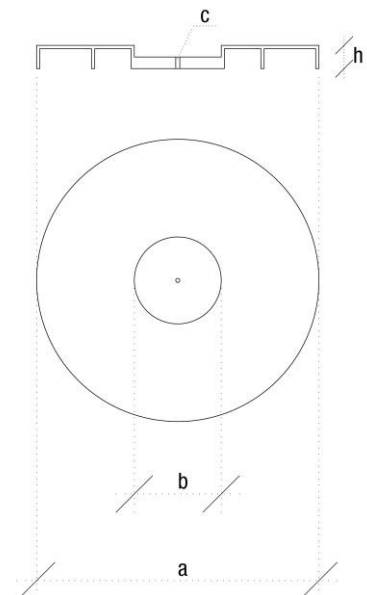

- Flexibility at low temperatures
- High puncturing resistance
- Will not rot
- Excellent weldability

### CHARACTERISTICS

Total diameter	a	90 mm
Cavity diameter	b	26 mm
Diameter of hole	c	22 mm
High	h	10 mm
Thickness	-	2,5 mm

### PRODUCTION STANDARD

Number of pieces on each box	100
Weight for piece	0,027 kg
Colour	White

CIVILROCK reserves the right, as technology and know-how progress, to modify without warning the composition and conditions of use of its materials, and subsequently their price. As a result, orders shall only be accepted on the basis of the terms and technical specifications applicable at the time of receipt.
