

ALSAN 770 TX

Product description:

ALSAN 770 TX is a 2-component, fast-drying and extremely flexible waterproofing resin based on PMMA (polymethyl methacrylate). It is intended for details and upstands with vertical construction elements.

Application areas

ALSAN 770 TX is used to create flameless fleece reinforced waterproofing for details and upstands with vertical construction elements.

Properties

- ETAG 005 with CE marking
- Broof (t1)
- service life: W3; imposed load: P1-P4
- climate zone: M, S; roof slope: S1-S4
- surface temperature: TL4/TH4
- root-resistant according to the FLL test method
- viscous/thixotropic for upstands and details

Conditions for application

Substrate and ambient temperature: min. 0 °C up to max. +35 °C.

Air humidity: max. 90 %.

The substrate temperature must be at least 3 °C above the dew point during application and curing.

Adequate ventilation must be installed in enclosed spaces.

Implementation

Substrate preparation:

The substrate must be prepared to ensure it is sound, dry and free from adhesion-reducing residue.¹

Mixing: Stir the product thoroughly until a smooth consistency is achieved. Transfer the required amount into a clean mixing tub. Add the corresponding quantity of catalyst for the amount of resin being used and mix at slow-speed for at least 2 minutes until a homogeneous consistency is achieved.

Application: ALSAN 770 TX is applied with a suitable roller or brush. Rule of thumb: apply approx. 2/3 of the resin under the reinforcement fleece and 1/3 wet on wet on top of the reinforcement fleece.

Fleece overlaps must be at least 5 cm wide. Resin must also be applied in between the overlaps.

Cleaning: When work is interrupted or completed, clean the tools thoroughly with ALSAN System cleaning agent, within the pot life of the material.

Consumption

Smooth and even surfaces: min. 2,5 kg/m²

Required amounts of catalyst

Table for 10 kg ALSAN 770 TX

Stir for at least 2 minutes.

Temperature [°C]	Catalyst [g]	Catalyst [%]
0	600	6,0
5	400	4,0
10	400	4,0
15	200	2,0
20	200	2,0
25	200	2,0
35	150	1,5

Reaction times (23 °C)

Pot life: ± 15 minutes

Rainproof: ± 30 minutes

Overlayable: ± 45 minutes

No maximum overlay time

Loadable: ± 180 minutes

Technical characteristics

Density (23°C): 1,25 g/cm³

Viscosity (23°C): 15000 mPa.s

Sd value: 9 m

ALSAN 770 TX**Packing**

5 kg and 10 kg bucket

Colour

RAL 7035

Storage, transport & shelf life

In its original unopened package stored in a cool, dry and frost-free place, the unmixed product has a minimum shelf life of 12 months.

Avoid, also on site, exposure of the containers to direct sunlight.

Opened packaging has a shortened shelf life and may gel prematurely. The product must not be applied once it has started to gel.

Safety information and risks

Refer to the relevant safety data sheet for more information.

Pay attention to the personal protective equipment.

GIS Code: RMA 10

Elimination

Fully cured material can be disposed of as household waste. Packagings and uncured material must be disposed of as hazardous waste.

Completely empty packagings can be recycled.
