

FLAGON PVC Metal Sheet

Description

FLAGON PVC Metal Sheet is made of a flexible PVC membrane bonded to a galvanized steel sheet. FLAGON PVC Metal Sheet is used for the realization of custom made finishing elements of a roof such as flashings and profiles. It is distinguished by a high resistance to weathering and UV-rays.

Characteristics

Composition	Standard	Unit	Value	Tolerance
Upper side			flexible PVC	
Lower side			galvanized steel	
Packing				
Total thickness		mm	1,8	
Thickness PVC membrane		mm	1,2	
Thickness steel sheet		mm	0,6	
Width		m	1,00	
Length		m	2 / 3	
Mass		kg/m ²	6,0	

NPD = no performance determined

Installation

Used for custom made finishing elements of a roof in combination with the flexible PVC waterproofing systems. The PVC part is welded with hot air.

Special indications

Hygiene, Health and Environment

The product does not contain any substance which is likely to be detrimental to your health or to the environment and complies with generally admitted Health and Safety Requirements.

Quality-, Environment- and Safety Management

SOPREMA always recognises as a high level of importance the quality of the products, the environment and safety.

For this reason, we operate independently monitored Quality and Environment Assurance Systems in line with **EN ISO 9001** and **EN ISO 14001**.
