

- Long-term elastic adhesive with high adhesive strength
- Can also be used at cold temperatures
- Suitable for connections on dry clean substrates

Packaging

	Contents per container [ml/g]	Box contents [units]	Accessories included
Cartridge	310	20	20 detachable nozzles

Characteristics

Material	dispersion adhesive
Minimum application temperature	
substrate:	not frozen
ambient:	-10 °C
Application temperature product [°C]	-10 to +50
Temperature resistance [°C]	-20 to +80
Curing time [h]	depending on absorbency of substrate 2-12

Product description

PAVABOND is used for creating airtight connections of vapour-control and airtight membranes on dry and clean substrates.

The adhesive power is very high, with fast drying. No clamping slat is required on load-bearing substrates. The adhesive can also be used at cold temperatures.

Adhesion trials are essential for materials that are not described in the application note.

Always consult the local regulations and installation guidelines of the manufacturer.

Health, Environment and Safety

This product does not contain any substance which is likely to be detrimental to your health or to the environment and complies with generally admitted Health and Safety Requirements.

For more information, please refer to the relevant safety data sheet.

Storage

Shelf life: 24 months unopened

Store cool and dry, protected from sunlight.
