

FLAGON PVC SEAM PREP

Description

FLAGON PVC SEAM PREP is a fluid used to prepare the welding zones of FLAGON PVC membranes prior to welding.

Characteristics

Composition	solvents
Application temperature	+5 / +25 °C

Packing & storage

Can 5 l

Minimum 12 months in original unopened packaging, stored in a dry and cool place at a temperature between +5 and +25 °C.

Installation

Use a solvent-proof and lint-free cloth.

Where required, apply liberally to remove contaminants from the welding zones of the FLAGON PVC waterproofing membrane.

Wait for the support to be dry and for complete evaporation of the solvents prior to welding.

Special indications

Hygiene, Health and Environment

For more information, please refer to the relevant safety data sheet.

Quality-, Environment- and Safety Management

SOPREMA always recognises as a high level of importance the quality of the products, the environment and safety. For this reason, we operate independently monitored Quality and Environment Assurance Systems in line with **EN ISO 9001** and **EN ISO 14001**.
