ALSAN DECO CHIPS

ALSAN DECO CHIPS is a finishing specifically designed for ALSAN 970 F wearing layer. They offer design options for the surface, while also optimising its non-slip property.

Material

Acrylate-based chips

Properties

- The chips are compatible with the ALSAN 970 F wearing layer
- Single colour or multiple colours can be used

Application

ALSAN DECO CHIPS are applied to the wearing layer (ALSAN 970 F) to enhance the appearance and enhance the non-slip properties of the surface. A non-slip level of up to R10 can be achieved.

Packaging

2 kg plastic bucket.

Colours

ALSAN DECO CHIPS are black, white or grey

Storage

Store in sealed packaging, in a cool and dry place protected from moisture.

Product application

Application equipment / tools
- Hopper spray gun
- Hand cast

Application
Use the hopper spray gun (or hand cast) to apply **ALSAN DECO CHIPS** to the wearing layer (ALSAN 970 F) while the resin is still wet. Depending on the required design of the surface, the different chips colours can first be mixed and a greater or lesser amount applied. A maximum of 50 g/m² can be applied. There should not be any excess chips (surface completely covered with chips) at any point. This could lead to reaction problems in the ALSAN 970 F wearing layer.
