

# 10 good reasons to specify **SOPREMA** membranes

## 1 Superior performances

**SOPREMA** standard polymer modified bitumen membranes are elastic, or plastic, ensuring full recovery - from stress down to -20°C, without cracking - as well as high temperature resistance.

## 2 Resistance to ageing

**SOPREMA** uses carefully blended bitumen which is not prematurely aged by oxidation even in extreme conditions. A proof of its reliability.

## 3 No skimping on polymers

The percentage of polymers in bitumen is critical, so **SOPREMA** blends the optimum polymeric content for performance, workability and quality. Users should avoid using membranes with a low polymeric content when they do not meet any British, French or European standards.

## 4 Easier to install

The "**FLAM**" range provides a thermofusible film to improve bonding if blow-torching techniques are used. Thanks to the **SOPREMA** torch-kit, the roofer can work standing up. Application options include pour and roll, mechanically fixed, hot air or self-adhesive. Select the right method or combination of methods for your job.

## 5 Aesthetic appeal

Cap sheets protected with slate chippings are available in 8 finishes + Copper, Aluminium and Stainless steel. **SOPREMA** roofs blend in with the surrounding architectural design.

## 6 Minimum maintenance

**SOPREMA**'s self-protected cap sheets completed with slate chippings, require only yearly inspection, as well as occasional maintenance for a theoretical service life of 30 years!

## 7 International experience

**SOPREMA** products have been used across the world for more than 100 years from northern Canada to the heat of Arabia and tropical areas. On roofs, roof gardens, basements, reservoirs and bridges.

## 8 Service

With the **SOPREMA** marketing, technical and distribution facilities, assistance is readily available to specifiers and contractors.

## 9 Fully insured

**SOPREMA**'s waterproofing membranes benefit from extensive guarantees provided by Europe's largest insurance companies to bring you peace of mind wherever you are.

## 10 Approved contractor network

Roofing contractors are closely evaluated before being authorised to offer insured guarantees; close partnership is maintained with Approved Contractors to ensure the highest standards
